

Dietify: Finalized UI/UX Blueprint & User Flow

This document serves as the master blueprint for the **Dietify** application, mapping the user journey to specific native Android (Jetpack Compose) screen states.

1. THE USER JOURNEY (FLOW)

Phase 1: Onboarding (The "Flash" Entry)

- 1. **Launch:** User opens Dietify.
- 2. **Step 1 (The Body):** User adjusts sliders for Age, Gender, Weight, and Height.
- 3. **Step 2 (The Rules):** User selects chips for Fitness Goal, Diet Type, and Allergies.
- 4. **Optional Auth:** User is prompted to sign up for Cloud Sync (Google/Email). They can [SKIP] to keep data local-only.
- 5. **Activation:** The app initializes the local Room DB and opens **Tab 1: The AI Coach**.

Phase 2: Daily Core Loop

- **Planning:** User negotiates with the Coach (Tab 1) -> AI proposes a meal card -> User taps [APPROVE] -> Tab 2 updates.
- **Execution:** User opens Tab 2 (Day View) -> Taps the [✓] checkbox to log a meal.
- **Manual Override:** User long-presses any meal card in Tab 2 -> Opens "Manual Edit Sheet" -> Adjusts name/macros manually -> DB updates.
- **Vision Logging:** User taps (+) in Tab 1 -> Snaps photo of lunch -> AI estimates macros -> Auto-logs to Tab 2 timeline.
- **Review:** User checks Tab 3 to see their consistency score and monthly trend.

2. SCREEN OUTLINES (WIREFRID BLUEPRINTS)

MODULE 1: Tab 1 - The AI Coach (Negotiation Hub)

Focus: Conversational intelligence and interactive cards.

Screen Outline: Main Chat

```
+-----+
| 🤖 Coach AI |
+-----+
| [AI]: Just logged that |
| Chicken Curry photo! 🍛 |
|                         |
| +-----+ |
| | ✅ AUTO-LOGGED | |
| | P:35g | C:70g | F:20g | |
| +-----+ |
+-----+
```

```
|
| [AI]: I noticed you manually|
| swapped your dinner too.    |
| Want me to adjust tomorrow? |
|-----|
| [ Yes, please ] [ No ]      | <-- Suggestion Chips
|-----|
| (+) [ Type message... ] 🗣️ | <-- Multimodal Bar
+-----+
```

MODULE 2: Tab 2 - The Tracker (Execution Hub)

Focus: Satisfaction and manual user autonomy.

Screen Outline: Day View

```
+-----+
| [ DAY ] [ WEEK ] |
|-----|
| 📅 17 TODAY: Heavy Leg Day (👉) | <-- (👉) Manual Add Button
|
| 🔥 2100 / 2800 kcal
|
| (P) (C) (F)
| [====] [=====] [== ] | <-- Macro Progress Rings
|-----|
| 8:00 AM - Pre-Workout
| 🥣 Oats & Banana [ ✓ ] |
| (Long-press to edit) | <-- Manual Override Trigger
|-----|
| 1:30 PM - Lunch (Manual)
| 🍽️ Beef Thali [ ] | <-- User edited from Chicken
+-----+
```

Screen Outline: Manual Edit (Bottom Sheet)

```
+-----+
| EDIT MEAL |
|-----|
| Name: [ Beef Thali ] |
| Time: [ 1:30 PM ] |
|
| Macros:
| Protein: [ 45 ]g
| Carbs: [ 60 ]g
| Fats: [ 12 ]g
|
| [ DELETE ] [ SAVE ] |
+-----+
```

MODULE 3: Tab 3 - The Stats (Progress Dashboard)

Focus: Visual proof of consistency.

Screen Outline: Monthly Insights
