Objective

Second-year Computer Science undergraduate (CGPA 8.91) specializing in Native Android Development with Kotlin, Jetpack Compose, and Clean Architecture. Proven ability to deliver production-grade Android and cross-platform mobile applications through freelance client work. Proficient in Data Structures & Algorithms in Java. Seeking an Android Developer Internship to build impactful mobile experiences and grow alongside experienced engineers.

Education

Krishna Institute of Engineering and Technology (KIET) <i>Bachelor of Technology in Computer Science and Engineering</i>	August 2024 – May 2028 CGPA: 8.91 / 10
Elpis Global School, Biswan, Sitapur <i>Senior Secondary (Class XII) – Central Board of Secondary Education (CBSE)</i>	2021 – 2023 Percentage: 89.2%
Regency Public School, Sitapur <i>Secondary (Class X) – Council for Indian School Certificate Examinations (CISCE)</i>	2019 – 2021 Percentage: 95.8%

Technical Skills

- Programming Languages:** Java, Kotlin, Dart, Jetpack Compose
- Data Structures & Algorithms:** Arrays, Linked Lists, Stacks, Queues, Trees, Graphs, Sorting, Searching, Dynamic Programming, Recursion
- Mobile Development:** Android (Jetpack Compose, XML), Flutter, Firebase, REST APIs
- Architecture & Design Patterns:** MVVM, Repository Pattern, BLoC
- Tools & Technologies:** Git, GitHub, Android Studio, VS Code, Gradle, Linux, Material Design 3

Projects

FinTech Admin Panel <i>Freelance Flutter, Dart, BLoC, Firebase</i> GitHub	Oct 2025 – Dec 2025
- Delivered production-ready cross-platform fintech management dashboard for client, serving as central management hub for cashback rewards, social features, and merchant services - Architected application using BLoC pattern, enabling scalable state management and clean separation of concerns - Integrated 7 backend microservices via REST APIs, handling 1000+ daily API calls with efficient error handling and caching - Implemented secure authentication flow using Firebase Auth with JWT tokens and encrypted local storage	
JobApp – Job Portal Platform <i>Freelance Flutter, Firebase, Provider</i> GitHub	Sep 2025 – Nov 2025
- Built and delivered complete job portal application for client with dual user roles (job seekers and employers) - Implemented real-time chat using Firebase Firestore with message delivery confirmation and read receipts - Developed search and filter functionality with optimized Firestore queries for fast job discovery - Integrated Firebase Authentication (Email/Google Sign-In) and Cloudinary for resume uploads	
Health Assistant <i>Kotlin, Android, MVVM, Hilt, Gemini AI</i> GitHub	Jun 2025 – Aug 2025
- Built Android health tracking app with step counting, prescription management, and health journaling using Kotlin - Integrated Google Gemini AI API for personalized health summaries, processing user data to generate insights - Implemented Clean Architecture with MVVM, using Hilt for DI and multi-module Gradle for scalability - Developed background step tracking service using Android sensors with Room database for offline persistence	

Extracurricular Activities

Coordinator, Android Domain <i>Innogeeks Club, KIET Group of Institutions</i>	September 2024 – Present Ghaziabad, India
Instructing 200+ students in Native Android Development through regular, structured classes, code reviews, and hands-on guidance	
Organizing Team Member <i>NASA Space Apps Challenge 2025, KIET</i>	October 2024 Ghaziabad, India
Co-organized campus edition of NASA Space Apps Challenge, coordinating mentors and 48-hour event logistics	

Achievements

- Maintained 8.91 CGPA (Top 5% of class) while actively contributing to technical projects and leadership roles
